## WORK EXPERIENCE

---

### YayCommerce

Nha Trang city, Viet Nam

Full-stack PHP WordPress + React Developer

March 2023 - Present

In the course of my employment, I focus on maintaining legacy code, debugging and troubleshooting, providing user support for various use cases, as well as refactoring outdated code and developing new plugins to enhance functionality.

### OTB

Nha Trang city, Viet Nam

VueJS Developer

June 2022 - February 2023

During this tenure, I collaborated with my team to build E-commerce websites and dashboards utilizing VueJS, while also contributing to UI component unit tests using Cypress and executing E2E automation tests with Nightwatch.

### FPT Software

Ho Chi Minh city, Viet Nam

Java Web Developer

December 2022 - April 2023

I began my career as a Fresher and Junior Developer at FPT Software in Ho Chi Minh City. During this period, I acquired essential skills such as constructing REST APIs with the Spring framework, developing a foundational understanding of Microservices, ReactJS, and Apache Kafka.

## EDUCATION

---

### HCMC University of Technology and Education

Ho Chi Minh city, Viet Nam

Bachelor's degree, Information Technology, Software Engineering

Graduation date: 2021

GPA: 2.7/4.0

### TOEIC

Score 830 - Issued by IIG Viet Nam

## SKILLS

---

Proficient programming languages: Java, Javascript, Typescript, SQL, PHP, HTML/CSS.

Familiar technologies and tools: ReactJS, VueJS, Spring Framework, SASS, WordPress, AntDesign, Git.

Familiar programming paradigms and principles: OOP, SOLID, design patterns.

Other skills:

- Basic knowledge on Microservice.
- Research and learn new technologies.
- Work independently.
- Collaborate with teammates.

## PROJECTS

---

### YayMail

WordPress plugin designed for Woocommerce email customization. Explore further at [YayMail](#).

Team size: 4.

Collaborated with team members to:

- Conduct research on existing source code.
- Refactor and optimize legacy features.
- Implement new features
- Migrate from VueJS to ReactJS.
- Address and resolve bugs.
- Implement data fetching utilizing AJAX and REST API.
- Support customers with specialized use cases.

Technologies: React JS, Zustand, React query, Typescript, PHP Wordpress, AJAX, REST API, Vue JS, SASS, Ant Design, and other Javascript libraries.

### Ecommerce dashboard

Dashboard page designed to assist internal users in overseeing orders, products, accounts, and other functionalities essential for managing operations within a T-shirt printing and selling business.

Team size: 5.

Worked closely with colleagues to:

- Research existed source code.
- Refactor and optimize old features.
- Implement new features.
- Fix bugs.
- Unit Testing.
- E2E testing.

Technologies: Vue JS, Typescript, SASS, Bootstrap Vue.

### Bank online loaning for business

The primary feature of the project enables customers to submit loan forms, undergo information verification, and receive results remotely, eliminating the need for in-person visits to the bank for the entire loan process.

Team size: ~5.

Worked closely with colleagues to:

- Analysis requirements/ user stories
- Joined the SCRUM team to develop APIs and services facilitating the sending of notification emails and duplication of data, leveraging Apache Kafka and Spring Quartz job. Tasks included calling internal APIs or third-party services using RestTemplate, as well as logging data to the database.
- Write Unit test.
- Do manual tests.

Technologies: Spring boot and Spring cloud with Microservices, Apache Kafka, RESTful API, Spring Data JPA, JSON web token, MSSQL server.
